DETAILED ACTION

Claim Objections

1. Claim 11 is objected to because of the following informalities. Claim 11 recite the phrase "cannot be started" twice. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 20-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Watts (6,22,539). The display control method by Watts comprises: controlling the display section to display details of a message, which indicates that image formation cannot be started as the help message, when the help key is operated while the message is displayed on the display section; and controlling the display section to display detailed information concerning a setting window, which is used for setting at least one condition for formation of an image, as the help key is operated while the message indicating that the image formation cannot be started is not displayed on the display section (Figure 4; column 5, lines 4-16; Figure 5A-5L; column 5, lines 17-37).

Art Unit: 2852

The method further comprises controlling the display section to display details of an operation instruction for the user as the help message, when the help key is operated while a message that includes the operation instruction for the user is displayed on the display section (Figure 4; column 5, lines 4-16; Figure 5A-5L; column 5, lines 17-37).

The message and the details of the message are an operation instruction for the user and details of the operation instruction, respectively, and said control means causes said display means to display the details of the operation instruction when the help key is operated while the identification information is displayed on said display means together with the operation instruction for the user. The message and the details of the message are a message stating that image printing cannot be started and details indicating that image printing cannot be started, respectively, and said control means causes said display means to display details indicating that the image printing cannot be started, when the help key is operated while the identification information is displayed on said display means together with the message stating that the image printing cannot be started (Figure 5D; column 5, lines 17-37).

Response to Arguments

4. Applicant's arguments with respect to claims have been considered but are moot in view of the new rejection. Claims 20-22, which were not addressed in the last office action, are addressed above.

Allowable Subject Matter

5. Claims 1-10 and 12-19 are allowed. Claim 11 contain allowable subject matter.
